Printed from <https://www.cancerquest.org/patients/treatments/cancer-treatment-tables> on 04/29/2024

Cancer is treated with a wide variety of drugs. The following tables contain descriptions of the drugs described on the CancerQuest website. They are not intended to be comprehensive lists of cancer drugs. Instead, they provide easy ways to find information on some of the most common cancer treatments. It is possible for a drug to appear in more than one table.

This section contains the following tables :

- [Chemotherapy Drugs](#)
- [Hormonal, Biological, and Antibody-based Treatment Tables](#)
- [Targeted Therapies](#)
- [Complementary and Alternative Medicine \(CAM\)](#)
